LinkedIn :
<https://www.linkedin.com/in/dev1008iharsh>

iOS Developer with 5+ years of experience, having delivered 20+ complete apps from scratch to App Store deployment and contributed to 35+ apps in different modules and features. Skilled in Swift (UIKit), Firebase, REST APIs, and Web3 integration. Strong in client communication (IELTS-certified), mentoring juniors, and collaborating across teams to deliver scalable and impactful iOS applications.

Professional Experience

Senior iOS Mobile Application Developer

Evince Infotech, Surat, (WFH) Rajkot, Gujarat

October 2024 - Present

- **Migrated and modernized legacy iOS codebases** to support newer iOS versions, adopting updated APIs and platform guidelines, reducing compatibility issues by 10%.
- **Worked extensively with multiple Apple frameworks** (UIKit, AVFoundation, CoreLocation, BackgroundTasks, etc.) and integrated third-party SDKs, accelerating feature delivery.
- **Developed and optimized API integration layers**, handling complex request flows, authentication, and error handling, improving data reliability and reducing API failures.
- **Upgraded deprecated system APIs and third-party libraries**, ensuring long-term stability and compliance with App Store requirements, lowering post-release issues.

Senior iOS Software Developer

HK Infosoft (onsite), Ahmedabad, Gujarat

March 2025 - July 2025

- **Enhanced and optimized an iPad application** by introducing new modules, improving performance, and implementing robust offline data loading, ensuring seamless user experience even without internet connectivity.
- **Built a secure multi-camera recording feature**, enabling simultaneous front and back camera capture, automated video processing into password-protected ZIP files, and reliable upload to Firebase for secure data storage.

Senior iOS Developer

Ambiw, WFH (On Company Contract), Rajkot, Gujarat

August 2022 - February 2024

- **Engineered and deployed iOS apps end-to-end**, from concept to App Store release, ensuring scalability and maintainability.
- **Optimized app performance**, reducing launch time by 10% and improving memory efficiency by 20%, leading to smoother user experience.
- **Eliminated memory leaks and networking inefficiencies**, **reducing crash rates by 10%** and improving user satisfaction through smoother app performance.
- **Developed watchOS extensions and widgets** for IRUSA ([App Store](#)), expanding product ecosystem.
- **Implemented clean architecture & reusable components**, decreasing development cycle time by 20%.
- **Mentored junior iOS developers**, helping them adopt best practices and grow into successful professionals.
- **Collaborated directly with clients**, ensuring requirements were met with high satisfaction, leveraging IELTS-certified (6.5 Band) English communication skills.

Junior iOS Developer

Unused Brain Studios (onsite), Rajkot, Gujarat

January 2022 - May 2022

- **Worked on a Crypto Wallet App**, integrating Web3 SDKs for secure transactions and token handling.
- Refactored and **optimized codebases of existing projects**, applying clean architecture and reusable patterns.
- Contributed features to healthcare and service-based apps with a focus on scalability.

Junior iOS Developer (Internship + Job)

Tiva ArtSoft (onsite), Rajkot, Gujarat

December 2019 - November 2021

- **Created and maintained various iOS applications from scratch to App Store deployment.** (Built and deployed more than 10+ iOS applications from scratch)
- Performed **migration of legacy apps** to latest Swift versions and frameworks.
- Implemented **REST APIs, Firebase modules, and UI features** across healthcare, e-commerce, and education apps.

Education

M.Sc. IT & Computer Applications

Saurashtra University (2020 - 2022) | 8.3 CGPA at Rajkot, Gujarat

B.Sc. Information Technology

Atmiya University (2017 - 2020) | 8.9 CGPA at Rajkot, Gujarat

Key Skills

- **Languages & Frameworks:** Swift, UIKit, Basic SwiftUI, Combine, Objective-C (working knowledge) -
- **Databases & APIs:** Firebase (Auth, Firestore, Analytics, Push), Core Data, Realm, REST APIs, JSON, Web3 SDKs -
- **Tools & Practices:** Xcode, Git/GitHub, CocoaPods, SPM, CI/CD, TestFlight, App Store Connect -
- **Architecture & Patterns:** MVC, MVVM, Clean Code, Modular Development -
- **Professional Skills:** Client Communication, Team Collaboration, Mentoring Juniors, Agile/Scrum -

Key Projects (Live on App Store)

- **Piplana Pane** – Gujarati **buy–sell marketplace app for farmers** (OLX-style) to trade cattle, tractors, crops, and agricultural products. Actively used by **100K+ users**, with focus on **performance optimization, efficient image loading**, and **secure API communication** to ensure smooth and reliable usage at scale. [App Store \(clickable\)](#)
- **Auction Management & Stadium Management Apps** – End-to-end event & auction handling solutions.
- **Rydezilla (Car Rental + Dealer App)** – Built complete **car rental ecosystem (customer + dealer apps)** from scratch to deployment. [App Store](#)
- **Just Insure** – Insurance management app, created from scratch to deployment. [App Store](#)
- **Moon Laundry** – Laundry booking app with payments & push notifications. [App Store](#)
- **MediNaz (Healthcare + E-commerce)** – Transforming forgettable facts into memorable pictures and characters, covering important topics with visual mnemonics and need-to-know facts. [App Store](#)
- **HealWell24 (Doctor & Patient Apps)** – Implemented **dual video functionality** for telemedicine, with features like **doctor video consultations** and **lab test bookings at home** for a complete healthcare experience. [App Store](#)
- **IRUSA** – Islamic Relief USA – Donation & campaign tracking app with **watchOS app + widgets**. [App Store](#)
- **Dashible Deals** – Local NYC deals & discount app, delivered for iOS & Android platforms. [App Store](#)
- **Eshal Perfumes** – Perfume e-commerce app, created from scratch to deployment. [App Store](#)
- **Repairmint Business** – Business app for commission agents & trading. [App Store](#)
- **Local Happenings (Community App)** – Built for Scioto County, Ohio: event listings, local businesses, and live radio streaming. [App Store](#)
- **Video Streaming App (YouTube-like)** – End-to-end streaming platform with **upload, playback, subscriptions, and recommendations**.

Portfolio Projects (GitHub/dev1008iharsh)

- **7Arts (iOS version)** – iOS implementation of an **online art marketplace** with galleries, auctions, and artist discovery. (Public iOS link unavailable) [Android Reference \(clickable\)](#)
- **TwitterHarsh** – Twitter/X-inspired app with **Firebase email authentication**, user profiles, tweets, photos, and **hashtag search**. Includes **All/My Tweets feeds**, **profile editing**, **custom photo picker** (camera, crop, filters), and **Dark/Light mode**. Built with **Firestore, Firebase Storage, and Combine**. [GitHub \(clickable\)](#)
- **HarshFlix (Netflix Clone)** – Swift-based movie trailer app using **TMDB & YouTube APIs** with **search**, category tabs, **in-app playback**, **Dark/Light mode**, **Core Data** offline saves, and enhanced visual effects. [GitHub \(clickable\)](#)

- **Harsh iShop (E-commerce App)** – End-to-end e-commerce app built **from UI design to deployment**, supporting **product listing, search, cart, coupons, order placement/cancellation, delivery date & time selection, Google Maps with address autocomplete (lat-long), payment gateway, customer support (Freshchat SDK), multi-language support (English & Arabic), and REST APIs with MVC architecture.[GitHub \(clickable\)](#)**
- **Crypto Wallet App** – iOS wallet application built using **Web3 SDKs** supporting **secure transactions, wallet balance tracking, and token management.** *(Public link not available)*
- **MatchingHarshCard** – Interactive **card-matching puzzle game** with timed gameplay, smooth touch controls, and sound effects, designed to enhance **memory and focus** while providing a fun experience for all age groups.[GitHub \(clickable\)](#)
- **TeaTimeHarsh** – iOS app for discovering tea places with **favorites, visits, and Google Maps navigation.** Implemented **offline support using Core Data + Firebase** and followed **Git branching & PR workflows.**[GitHub \(clickable\)](#)
- **AuraEcomShop** – E-commerce iOS application built using **Firebase** and **entirely in Swift with a programmatic UI (no Storyboards).** Designed with **clean, scalable architecture** and **modular code structure**, following industry-standard iOS best practices.[GitHub \(clickable\)](#)
- **SwiftGenericApiMVVM** – Implemented a **generic, reusable networking layer** using **URLSession** with **MVVM architecture**, centralized API handling, and memory-safe design to ensure clean, scalable, and bug-resistant network management.[GitHub \(clickable\)](#)
- **HarshVariousApiCode** – Built a **reusable iOS utility and networking framework** to speed up development across apps. Includes **custom image downloading with caching, generic TabBar, barcode handling, common utility classes, UIImagePickerController, image upload using URLSession, Alamofire image upload, LocationManager, generic API clients using URLSession(Apple's way), generic Alamofire networking, and Swift models with SwiftyJSON parsing.** Designed with **scalable, memory-safe architecture**, allowing developers to integrate features by simply calling shared classes, significantly reducing repetitive code and development time.[GitHub \(clickable\)](#)
